

Sprint 2 Report

FinPrint

Morgan Scofield, David Ip, Kevin Crumb, Erik Lau, Mitri Syriani

Actions to Stop Doing

- We should stop going off topic during scrum meetings because it makes meetings less effective.
- We should stop rescheduling scrum meetings because it makes meetings seem less important than they are.
- We should stop having each component handle the authUser state and attempt to lift the state into higher order components

Actions to Start Doing

- Everyone should visit the lab so we can get more hands-on experience working with the 3D printers and get insight from Todd.
- Make pushes to the github more frequently so everyone is up to date and there are less merge conflicts with large pushes.

Actions to Keep Doing

- We should keep researching softwares and technologies we are using in our project to allow us to better understand the inner workings of our project and work more efficiently.
- Keep up the pace of progress, the project is coming along much better than the previous sprint.
- Keep in contact with the team.

Work Completed/Not Completed

- As a user, I want a login page -- Complete
- As a user, I want the website to have an aesthetic, easy to use UI -- In progress
- As a user, I want a database to hold user data -- Complete
- As a user, I want a personal account page where I can view my transactions, uploads, and designs -- Incomplete
- As a user, I want to be able to upload/download designs -- In progress

Work Completion Rate

User Stories Completed -- 2/6 (These user stories were somewhat bigger than last sprint)

Number of Days -- 21

Ideal Work Hours Estimate -- 10-12 hrs/week/person -- 150-180 hours total

Actual Work Hours Estimate -- ~11 hrs/week/person -- ~165 hours total
