

Sprint 3 Report

FinPrint

Morgan Scofield, David Ip, Kevin Crumb, Erik Lau, Mitri Syriani

Actions to Stop Doing

- We should stop rescheduling scrum meetings because it makes meetings seem less important than they are.
- We should stop being late for meetings for the same reason.
- Stop attempting to take on tasks alone -- more group development/help and reach out to mentors more

Actions to Start Doing

- Start planning out activities for next quarter.
- Delegate tasks and research specifics for 3D integration with our existing project.

Actions to Keep Doing

- Communicating well about problems resulting from merge's and problems with individual group members.
- Researching different kinds of 3D printing technologies, including hardware and software alternatives to things like Octoprint.
- Consider using a library for state management as a lot of issues were caused because of this
- Continue with linking props of pages to the access particular database refs. May be easier to do with a state management tool.

Work Completed/Not Completed

Completed

- Protected routes with authentication (protected pages cannot be accessed until a user is logged in and will redirect them otherwise)
- As a developer I want a database that can be linked to easily and can take in products and users
- As a user, I want the website to have an aesthetic, easy to use UI -- In progress
- As a user, I want a personal account page where I can view my transactions, uploads, and designs -- In progress

Not completed

- As a user, I want to be able to upload my own designs -- In progress
- As a user, I want to be able to download designs -- Incomplete
- As a user, I want my profile page to represent my current//past transactions and/or products to sell.

Work Completion Rate

User Stories Completed -- 1/4 (This doesn't necessarily mean no progress was made)

Number of Days -- 21

Ideal Work Hours Estimate -- 10-12 hrs/week/person -- 150-180 hours total

Actual Work Hours Estimate -- ~9-10 hrs/week/person -- ~135-150 hours total
