Definition of Done -- Fin Print -- CMPS 116

The following is the current –tentative – definition of done for CMPS 116 Fin Print team. It will be updated as style develops. The style guide is not concrete as exceptions may need to be made with due diligence.

Tl;dr{ In short, the definition of done can be condensed in its entirety to match with the core of our style guide in it that the bottom line is that 'the client side site must not crash'.}

===

A task is not considered done until:

1. Core functionality of task is fulfilled
2. New functionality is integrated in other parts of the software
3. No unnecessary warnings outside the scope of //eslint exceptions, firebase socket bugs, and unused variables.
4. New code integrated in master branch.
5. Team is notified on status of the task.
6. New code has been properly formatted
    a. Imports are relative path
    b. Imports are lightweight
    c. Good variable naming practices
